

# form提交 - 常用属性

- action: 请求的URI
- method: 请求方法 (GET、POST)
- enctype: POST请求时, 请求体的编码方式
  - application/x-www-form-urlencoded (默认值)
    - ✓ 用&分隔参数, 用=分隔键和值, 字符用URL编码方式进行编码
  - multipart/form-data
    - ✓ 文件上传时必须使用这种编码方式

# form提交 – multipart/form-data

■ 参考[RFC 1521](#)

■ 请求头

□ Content-Type: multipart/form-data; boundary=xxx

**multipart-body** := preamble 1\*encapsulation close-delimiter epilogue

**encapsulation** := delimiter body-part CRLF

**delimiter** := "--" boundary CRLF ; taken from Content-Type field.  
; There must be no space between "--" and boundary.

**close-delimiter** := "--" boundary "--" CRLF ; Again, no space by "--"

preamble := discard-text ; to be ignored upon receipt.

epilogue := discard-text ; to be ignored upon receipt.
